

ENSE 400 Capstone Bi-Weekly Scrum #2

Prime Software

Jinkai, Jiahao, Mackenzie

Oct 25, 2019

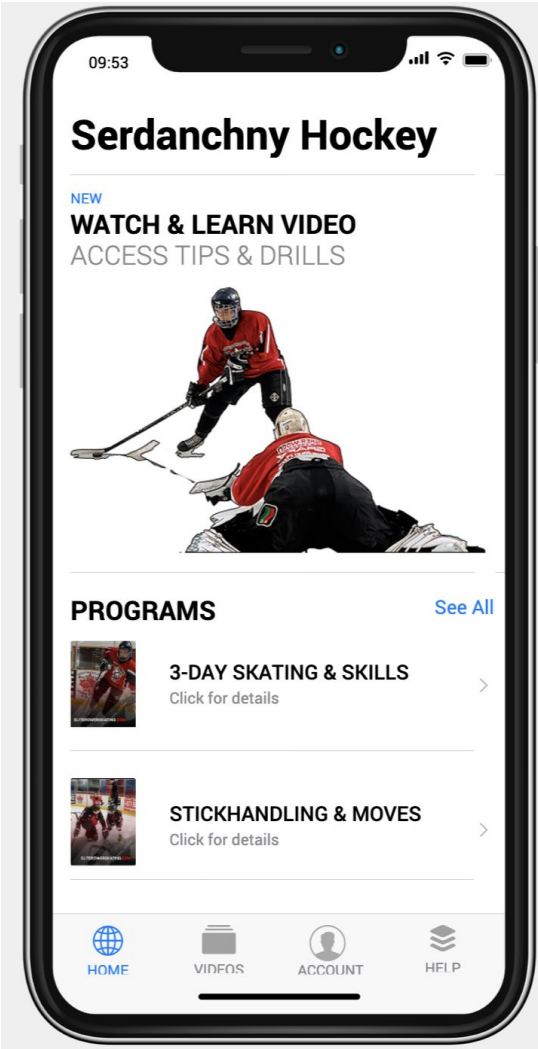

Project deats

- **What problem(s) are you trying to solve?**
 - The customers needs/requirements
 - Synchronization of data on Xcode
 - Figure out the coding environment (Github, Xcode)
 - workflow of code functionalities(interconnection)
- **What gap are you filling?**
 - Figure out what functions the customers really need
 - Everyone's responsibilities
- **What innovation are you creating?**
 - We mainly focused on the theoretically stuff, such as data sharing, customers requirements, MVP, designing flaws

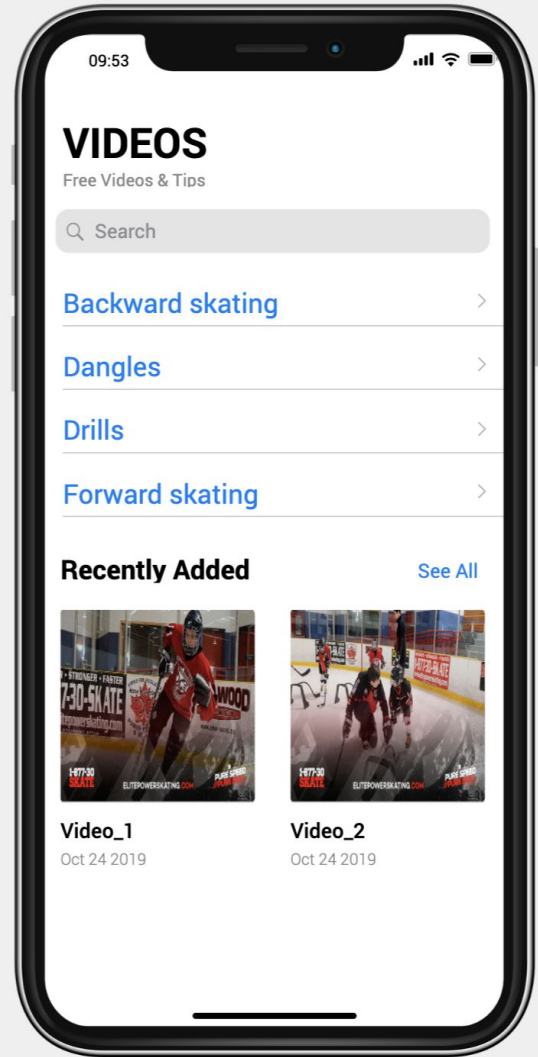

Project & documentation review

- **What are you currently working on?**
 - We will be working on the user interface implementation, make a prototype of each layout, and integrate them together (a real live APP)
 - Code functionalities documentation
 - Source control
 - Github branches
 - Xcode
 - Keep learning
 - get more familiar with using Swift language
 - Code management
 - Working as a team

Project demo

Group reflection

- **Do you feel you are on track?**
 - Yes, we are.
 - Clear team members' Responsibilities
- **Do you feel there are barriers to your success (if any)?**
 - Try hard to understand the tutorials for learning Swift from Youtube (Internet)
 - Everyone's Code functionalities management and documentation
- **Do you need any help going forward?**
 - Not yet needed.
- **Any other questions or concerns?**
 - So far so good, we are on track!
